FOUNDER'S MESSAGE

As the CEO of one of India's fastest growing digital marketing and IT company, I meet bright students everyday who have recently completed their courses and are eager to show their skills.

But unfortunately, we hire only 1% of all youngsters we interview. Majority of them have fancy certificates from fancy institutes, but when we ask them to demonstrate their skills on a live project, most don't even know the basics!

Each of them had spent around lakhs of rupees to acquire these skills and to get the certificate, but most of the subjects taught to them are of no use on actual projects. We found that the majority of institutes had added these irrelevant courses just to increase the course fees.

The idea of BDIT Institute came from a thought to help students and parents from being misled. Here we only teach those skills and courses which are actually required for students in their professional careers with a fraction of cost!

Being a part of the industry, we know what organizations look for in employees and hence train you only on those courses which are really required to excel in your career.

Once you complete your course with us, we assure that the skills you have learned will make you industry ready. We can even hold them in our organization itself or help them place with any of our Indian or international clients as well.
